SYSTEM PLANNING

3D-planning software 34-35

The concept of our system lab furniture is founded on 4 corner stones:

QUALITY

Criteria for our furniture are based on the exacting requirements of industry and laboratories. The combination of high-quality materials and carefully thought-out construction guarantees stability and lasting quality.

FLEXIBILITY

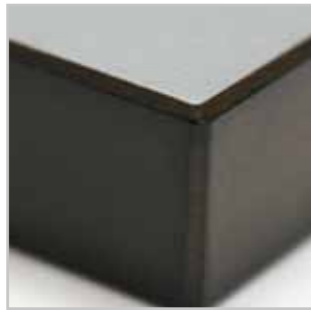

The ATM-system provides a customized and flexible platform for personal workspaces, entire buildings, and everything in between.

FUNCTIONALITY

Archiving solutions and covered cable guides ensure a well-organized and efficient workplace.

DESIGN

Clean lines and high-quality materials create a fascinating, timeless and homogeneous style.

HPL solid material

HPL SOLID MATERIAL

High density HPL solid material is recommended for desk surfaces which have to endure heavy-duty service and bear extreme loads. Furthermore it is – by its characteristic black edging and the low height of 1.5 cm – a topical design material.

HPL composite material

HPL COMPOSITE MATERIAL

The fibreboard consists of a high-quality chip board core which is coated on both sides with HPL and sealed with 2 mm edging.

The soft grey coating (0.5 mm) is completely pressed together with the core.

The HPL coating of the HPL composite material+ (0.7 mm) is produced with maximum pressure similar to solid material. The plum tree and bog oak design of the HPL surface is brought out clearly by a supplementary three-dimensional structure.

2 mm edging

DECOR

The neutral soft grey finish is easy to blend with every color palette and complements any décor. The system cabinets are both modern and elegant with their high-polish front finishing.

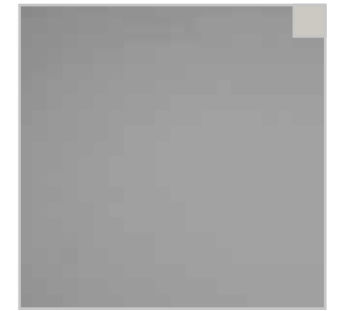

Plum tree effect represents the medium colour range in wood-finishing, bog oak is a dark variety. Subtle shades of grey allow trendsetting combinations.

A large range of other colours and structures is available on request.

HANDLES

The matte chrome-plated cast metal handles with a clean and timeless design are curved on the inside and therefore very comfortable to grab.

Other designs are available on request as well.

Soft grey

Plum tree

Bog oak

SYSTEM DETAILS

HIGH PRESSURE LAMINATE (HPL)

Duroplastic HPL is produced by combining several layers of paper and resins under high pressure. Paper as a renewable raw material makes up about 60% of HPL. The top coating is made of robust and heat-resistant melamine.

In addition, it is especially shock- and wear-resistant. HPL has a higher durability than other conventional products. The surface is hygienically sealed and easy to clean.

SYSTEM WRITING DESKS

SPACE AND COMFORT
Our flexible writing desk system creates an optimal and modern workplace design. The stable, vibration-cushioned construction is especially suited for vibration sensitive and heavy devices.

AMPLE LEGROOM
Functional accessories and a spacious cable duct with covered access from the table top allow comfortable seating without irritating cables.

PRACTICAL DESIGN
Besides linear construction, angle combinations offer a lot of creative potential in making your workplace pleasant and efficient. Freestanding arrangements get an elegant touch by introducing angle slants.

SECURE LOCKING SYSTEM

The soft-closing system prevents the drawers from slamming and shuts quietly and gently. The steel framed drawers are equipped with a safety brake. To prevent tipping only one drawer can be opened at a time, except the upper drawer for accessories which is independently usable. The container is completely lockable.

THE RIGHT PLACE

The optimal place for seating, working and feeling at home. Our comfortable office chairs with modern design support dynamic seating by stabilising an upright posture.

OFFICE CHAIRS

SENSE OF WELL-BEING

The ergonomic concept of our office chairs enables dynamic seating and an individual adjustment to the user.

Regularly changing the seated posture is the most effective protection of the back during sedentary work. The backrest follows the movement of the back precisely and the seat-suspension guarantees shockproof sitting down.

Furthermore the office chair adapts comfortably to your personal needs concerning seat height and depth, body weight and height of back rest.

ORBIT NETWORK

The office chair is distinguished by its light and transparent Softnet backrest. It adapts to the user and provides optimum support for the spine. The result is the characteristic Orbit-“waterbed” cushioning effect: the feeling of being cushioned by the Softnet.

SWIVEL CHAIR ORBIT NETWORK

Backrest supporting frame in glass fibre-reinforced plastic with transparent black Softnet mesh, backrest frame aluminium polished

OFFICE CHAIRS

DISTINCTIVE COMFORT

Our office chairs are certified in accordance with guideline L-Q 01-06. The QUALITY OFFICE GUIDELINE defines quality standards for office furniture, taking recent ergonomic studies into account. This gives the concepts of quality, ergonomics and prevention of health and safety a high and comprehensive status in daily office routine.

SYSTEM CABINETS

CLEAR SYSTEM

Our flexible cabinet and rack-system presents an elegant and economical solution for your storage demands. Different heights and combinations will help you equip your office or archive efficiently.

QUALITY TO THE LAST DETAIL

The latest generation of hinge technology closes doors softly and easily.

The load bearing broad drawer with its parallel slide rails is distortion-free and sturdy even if it is completely pulled out. The drawers close soft without slamming by a self-closing system. All cabinets can be equipped with an optional lock.

The shelves are adjustable in different heights and can be added if required. Drawers and cabinets can also be equipped with different accessories, e.g. hanging registers, CD-inserts etc. Glass doors are available on request as well.

CONFERENCE FURNITURE

GET INTO CONVERSATION

Our vibration-cushioned conference tables match perfectly with the comfortable visitor chairs. The clear and timeless design promotes both a communicative and representative ambiance.

DESIGN WITH A MEANING

The square conference table perfectly fits a clear concept in furnishing. The rectangular model provides large space for working material, Laptops etc. even during conferences with many participants. The slender training table gets a lot of work space in training fields.

Order No.	95004853

CONFERENCE FURNITURE

LOVE OF FORM AND FUNCTION

Our visitor chairs are certified in accordance with guideline L-Q 01-06. The QUALITY OFFICE GUIDELINE defines quality standards for office furniture, taking recent ergonomic studies into account.

Cantilever chairs invite dynamical seating and enhance the sense of well-being.

LAB FURNITURE

GRANTED STABILITY

The vibration cushioned construction and the tough surface of our system tables are perfectly suited for heavy or sensitive lab devices, e.g. microscopes, hardness testers or scales.

Our office furniture line is coordinated with our wide range of lab equipment. This makes the working environment more efficient to people.

STORAGE OF SAMPLES

Storage of samples is getting easy and clear by stackable sample boxes with covering. The sample surface is perfectly protected against dust and damage.

ON THE SPOT

This is an exemplary realised combination of office and lab. The well thought-out concept of light and colour creates a pleasant and open ambiance and a comprehensive look by applying company coloured blue details.

PASSIVE VIBRATION CUSHIONED

Sensitive measuring devices e. g. microscopes, hardness testers, scales are very exacting regarding their environment. The new passive vibration cushioned hard rock plate reduces external vibrations which could influence the measuring results. Isolated setup and no contact with other furniture is recommended.

SYSTEM LAB TABLE WITH HARD ROCK PLATE

Depth	80 cm
Length	88 cm
Load capacity	400 kg
Height	70-80 cm
Order No.	A7500214 - HPLD1

in combination with hard rock plate only available in HPL solid material soft grey

SYSTEM PLANNING

YOUR IDEAS

View your new lab virtually!

The ATM 3D Lab is a powerful computer program that allows you to view drawings of custom built equipment and laboratory layouts in a realistic, three dimensional format.

We would like to get inspired by your vision and work out individual solutions in cooperation, perfectly fitting almost any floor plan and demand.

After compiling a list of all materials and automatically generating a price quotation you can experience a scaled impression of your new workplace.

The furniture is completely manufactured in our company and meets highest quality demands – "Made in Germany" by ATM.

Always a step ahead
